ordering guide

- Cumberland Depot Luminaire
- Custom Wooden Post

ordering logic

model

CPD20 20" Cumberland

lens material

- P polycarbonate
- G glass

lens finish

- CS clear (sphere)
- WS white (sphere)
- CB clear bullet (glass)
- WB white bullet (glass)
- CT clear textured (acorn)
- FT frosted textured (acorn)
- WT white textured (acorn)

source

- PSMH 50-150W
- HPS 50-150W
- CF 13 - 42W
- INC 150W

optics

- RF3 refractor type III
- RF5 refractor type V
- BL bare lamp

electrical options

- FS fusing
- PEC photocell
- QRS quartz restrrike
- IQ lamp/ballast diagnostics

model (cont)

CPD20 20" Cumberland

color (see page 33 for additional information)

- BB black
- BZ bronze
- BG green
- BW white
- BY gray
- RAL RAL _____
- OTHER _____

footnotes:

1. Medium socket is standard for all HID sources under 250W.
2. Factory suggests that BL option is selected only when a low wattage source is used in conjunction with non-clear or refractive lenses.
3. LED and CF sources utilize a 120-277 voltage-sensing electronic driver, HID sources utilize a Quad-Tap (120, 208, 240 & 277V) core & coil magnetic ballast, consult factory for 347 or 480V.
